BearingNet – Inventory

Introduction

If you want to use BearingNet to help sell your inventory then you will need to load your inventory into the main database. This is performed in the inventory screen. This screen also shows you statistical information about your inventory and provides inventory management facilities.

Inventory Maintenance **User Guide**

Your inventory Click here if you would like a copy of your current Bearingnet stock list. The file will be sent by email to _____ and will be in the correct format for automatic inventory upload.

Automatic inventory upload Transfer your stock file to us (it must be in the correct format)
More details about the automatic upload facility.

Loading your inventory for the first time Please email your inventory in an Excel spreadsheet or another similar file format. Part Number, Quantity, and Brand are required. Description and Price are optional. Once prepared, email your inventory list to: stock@bearingnet.net Please send a replacement list every month. We will load your inventory for you. Please tell us if the list is a replacement or addition.

Delete all of your inventory To delete all your inventory please email stock@bearingnet.net

Total hits this month This is the number of searches performed on Bearingnet where a least 1 item of your inventory was displayed as part of the results. Use this as an indicator of how effective your inventory list is.

Summary of total hits for the year

Month	Hits
Oct	240,000
Nov	235,000
Dec	220,000
Jan	255,000
Feb	280,000
Mar	165,000
Apr	115,000
May	110,000
Jun	120,000
Jul	115,000
Aug	110,000
Sep	115,000

Pulleys 	986	28/09/2010	0	18	Add Edit
Misc 	986		0	0	Add Edit

The ‘**Your Inventory**’ table displays information about the inventory that you have loaded into BearingNet. If you have not loaded any inventory into BearingNet then no information will be displayed.

The inventory table has 1 line per inventory type. Each line shows the following information:

Lines of Inventory

The total number of lines of inventory loaded into BearingNet. For example if 12,322 is displayed then 12,322 different inventory records have been loaded into BearingNet.

Oldest inventory dates from

This is the date that the oldest inventory was loaded. For example if some inventory was loaded on the 12 of March 2009 and the rest was added today the date displayed would be the 12 of March 2009 as this is the oldest inventory.

Total Hits this month

A hit is a measure of the number of times your inventory has been found by other BearingNet members when they search. For example if you have a 22222 in your inventory and another company searches for a 22222 then the hit count for your inventory will increase by 1. So if the hit count is 2433 then your inventory has been displayed 2433 times this month. The number of inquiries that you receive should be higher if the hit count increases.

Total Hits Last Month

A hit is a measure of the number of times your inventory has been found by other BearingNet members when they search. The Hits Last month is used to compare with the “**Total Hits this Month**” to see if your hit count is increasing or decreasing. For example if the Hits count is 2052 this month and 1232 last month then you can see that your inventory has been found more often this month and you might expect that the number of inquiries has also increased.

Add Inventory

Add inventory

If you have any questions, please contact stock@bearingnet.net

Select part type

Part number	Qty	Description	Price

Inventory can be added manually. To add inventory manually click on the 'Add' link. This will display the Add Inventory Table. The 'Select Part Type' box is displayed. Ensure that the correct part type is displayed. To change the part type click on the pull down list and select the part type required.

In the 'Add Inventory' table enter the part number, brand, quantity, optional description and price for each inventory line. You can add up to 20 inventory lines at a time. Once you have entered all the part numbers click on 'Save'. The inventory is then added to your inventory in the BearingNet database. Repeat this process to add more inventory.

Add inventory

If you have any questions, please contact stock@bearingnet.net

Select part type

Enter Data →

Part number	Brand	Qty	Description	Price
NU215	SKF	2		

For adding large amounts of inventory please look at the other methods detailed below.

Edit or Delete Inventory

Quantities of inventory can be edited and deleted manually. To edit your inventory list, click on the 'Edit' link.

Lines of inventory Oldest inventory dates from Total hits this month Total hits last month						
Bearings		353788	09/04/2010	27047	165146	Add Edit

NU 215	HOF	<input type="text"/>	<input type="text" value="1"/>	<input type="text"/>	<input checked="" type="radio"/>	25/06/2010 14:53	Delete

It is only possible to edit the quantity, description and price field of the inventory. To delete a part number first find the part number, then either change the quantity to 0 then click 'Save' or click 'Delete'. The inventory record is then deleted. For example, to delete an inventory item 22222 brand SKF first find the part number 22222 using the search inventory facility, or by browsing through the inventory until the part number is displayed. Then either change the quantity to 0 then click 'Save' or click 'Delete'. The part number 22222 brand SKF is deleted from the inventory list.

To edit the quantity, description or price of a part number, first find the part number that you want to edit. Once it is displayed make the required changes and click on 'Save'. The details have been edited.

Inventory Maintenance Table

This table displays information and advice on loading your inventory into BearingNet.

Inventory Maintenance		User Guide
Your inventory	Click here if you would like a copy of your current Bearingnet stock list. The file will be sent by email to _____ and will be in _____ the correct format for automatic inventory upload.	<input type="button" value="Request stock list"/>
Automatic inventory upload	Transfer your stock file to us (it must be in the correct format) More details about the automatic upload facility. Your unique stock identifier is:	<input type="button" value="Upload"/>
Loading your inventory for the first time	Please email your inventory in an Excel spreadsheet or another similar file format. Part Number, Quantity, and Brand are required. Description and Price are optional. Once prepared, email your inventory list to: stock@bearingnet.net Please send a replacement list every month. We will load your inventory for you. Please tell us if the list is a replacement or addition.	
Delete all of your inventory	To delete all your inventory please email stock@bearingnet.net	
Total hits this month	This is the number of searches performed on Bearingnet where a least 1 item of your inventory was displayed as part of the results. Use this as an indicator of how effective your inventory list is.	

Your Inventory/ Request Stock List

This option will instruct BearingNet to send an email of the entire inventory that you currently have listed in BearingNet as a text file attachment to the registered user. The file that is sent will be formatted in exactly the correct format needed to Automatically Upload your inventory. You can use this file to prepare your inventory by editing the data in the file and once complete, reload the inventory back into BearingNet using the Automatic Upload facility. You can also use this file to show you the correct format for the automatic upload. To receive a copy of your inventory, click on ‘Request Stock List’ and it will be emailed to the registered user. More information is available for Automatic Upload in the document <http://www.bearingnet.net/doc/autostockuploaden.pdf>

Auto Upload Program

There are two options to make your inventory list ready for the AutoUpload program. These are:

- Option 1** Create your AutoUpload list manually from your normal stock-listing.
- Option 2** Obtain a copy of your stocklist that is already loaded in BearingNet, which will be correctly pre-formatted for use with the AutoUpload program.

BearingNet – Inventory

Option 1 – Creating and formatting your inventory

Once you have created your list, you will need to format it correctly. Below you will see a correctly formatted Excel spreadsheet that has all of the information required to work with the AutoUpload program.

	A	B	C	D	E	F
1	USER NAME	STOCK ID CODE	1	sales@bearingnet.net		
2	!Part	Brand	Quantity	Description	PT Type	Price
3	6202	SKF	6	Bearing	B	€ 0.98
4	06B1-28-RW	NEUTRAL	8		S	€ 8.22
5	16X24X7B1	SIMRIT	6	Seal	L	€ 2.34
6	10-B	NEUTRAL	25 ft	Chain	C	€ 159.00
7	SPA907	OPTIBELT	123	Belt	T	€ 7.30
8	14H150	SIT	57		P	€ 52.37
9	290-10ML	LOCTITE	81	GLUE	M	€ 11.24

To create a spreadsheet (shown above), please follow these instructions:

In **Cell A1**: Enter your BearingNet User Name which is what you use to login to BearingNet.

In **Cell B1**: Enter your unique BearingNet Stock ID, this can be found by clicking on “Your Account”, then “Your Inventory”. Your code will look like this example: 1ABC-ABCD-A1BC-1ABC.

In **Cell C1**: Enter either “1” or “0”. The character “1” means you want to REPLACE your entire inventory within BearingNet with this new stocklist. The character “0” means you want to ADD the items in the new stocklist to your existing stock in BearingNet.

In **Cell D1**: Enter the email address where you want the email receipt from BearingNet to be sent. This email will confirm that your stocklist has been entered successfully.

Cells A2, B2, C2, D2 and E2 are for your information & contain descriptions of what you should enter in the columns below:

Column A is for the **PART NUMBER** of the item you wish to enter.

Column B is for the **BRAND** of the item you wish to enter.

Column C is for the **QUANTITY** of the item you wish to enter.

Column D is for the **DESCRIPTION** of the item you wish to enter.

Column E is for the **PT TYPE** of the item you wish to enter.

Column F is for the **PRICE** of the item (optional)

The “!” character means that this line of information will be ignored by the AutoUpload program and not entered into BearingNet.

Explaining the PT Type needed for Auto Upload

The PT Type is the most important part of your AutoUpload Excel spreadsheet. If you do not enter the correct information, your inventory will not be processed.

Shown below are the PT Type codes and their meanings:

B is for BEARINGS

S is for SPROCKETS

L is for SEALS

C is for CHAINS

T is for BELTS

P is for PULLEYS

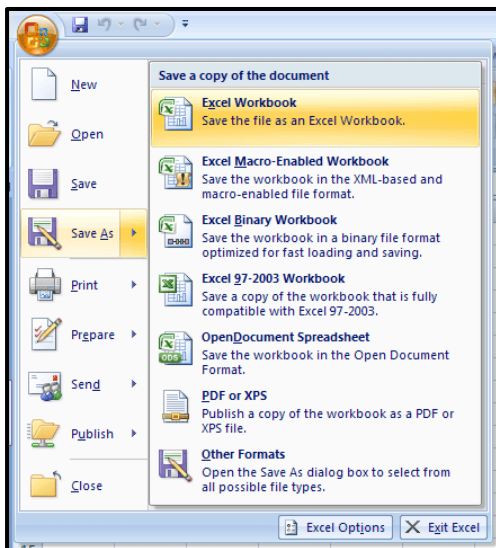

M is for MISCELLANEOUS

	E	F
ingnet.net		
	PT Type	Price
	B	\$0.
	S	\$8.
	L	\$2.
	C	\$159.
	T	\$7.
	P	\$52.
	M	\$11.

Once you have completed your Excel spreadsheet with all of the items you want to enter into the BearingNet search system, check that you have entered all of the information required for the program to work correctly: **User Name, Stock ID, "1" or "0", Email Address and PT Type.**

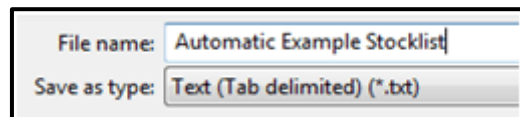

***The main reason for a stocklist being rejected by the AutoUpload program is missing information.**

Please carefully check that your list is complete before entering.

You will now need to save the list you have created. To do this you will need to click on File then 'Save As', then select the location you wish to save the file on your computer. Give the file a suitable name, choose the location for the file and select the correct format which **must** be:

Text (Tab Delimited).

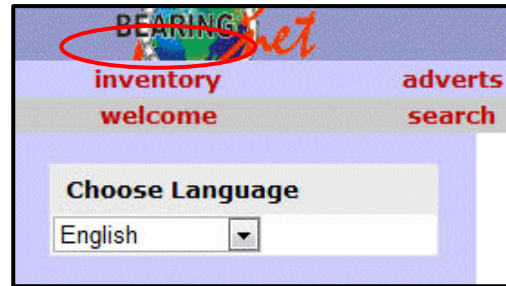

If you save the file in any other format, then it will be automatically rejected.

Option 2 – Obtaining your pre-formatted stocklist

The second way to load your products into BearingNet is to obtain a copy of your stocklist already in BearingNet, which has been pre-formatted for use with the AutoUpload program.

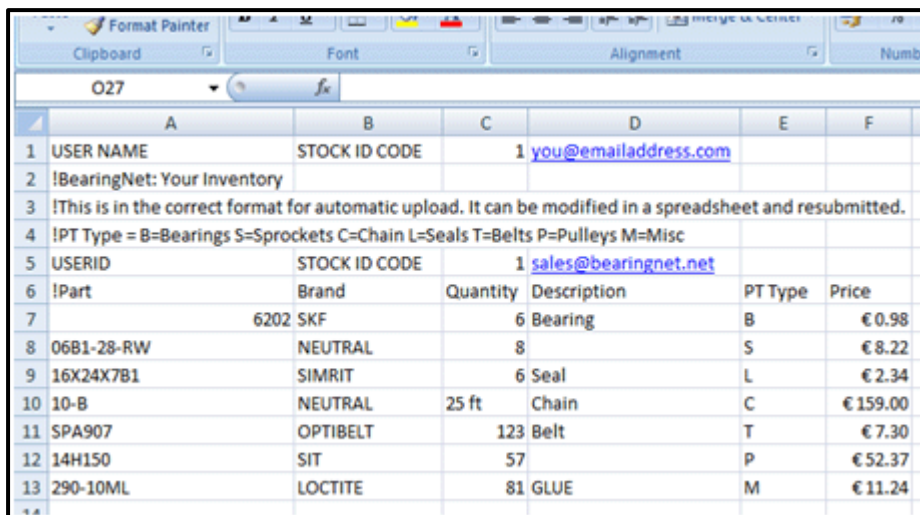

To do this, you will need to Login to BearingNet and go to the 'Inventory Page'.

When you are at the Inventory page, you will need to click the 'Request Stock List' button. An email will then be sent to you, with all the stock you have on BearingNet contained in an attachment.

Inventory Maintenance		User Guide
Your inventory	Click here if you would like a copy of your current Bearingnet stock list. The file will be sent by email to _____ and will be in the correct format for automatic inventory upload.	<input type="button" value="Request stock list"/>
Automatic inventory upload	Transfer your stock file to us (it must be in the correct format). More details about the automatic upload facility. Your unique stock identifier is:	<input type="button" value="Upload"/>
Loading your inventory for the first time	Please email your inventory in an Excel spreadsheet or another similar file format. Part Number, Quantity, and Brand are required. Description and Price are optional. Once prepared, email your inventory list to: stock@bearingnet.net Please send a replacement list every month. We will load your inventory for you. Please tell us if the list is a replacement or addition.	
Delete all of your inventory	To delete all your inventory please email stock@bearingnet.net	
Total hits this month	This is the number of searches performed on Bearingnet where a least 1 item of your inventory was displayed as part of the results. Use this as an indicator of how effective your inventory list is.	

When you open the attachment in Excel, it will look like this.

	A	B	C	D	E	F
1	USER NAME	STOCK ID CODE	1	you@emailaddress.com		
2	!BearingNet: Your Inventory					
3	!This is in the correct format for automatic upload. It can be modified in a spreadsheet and resubmitted.					
4	!PT Type = B=Bearings S=Sprockets C=Chain L=Seals T=Belts P=Pulleys M=Misc					
5	USERID	STOCK ID CODE	1	sales@bearingnet.net		
6	!Part	Brand	Quantity	Description	PT Type	Price
7		6202 SKF	6	Bearing	B	€ 0.98
8	06B1-28-RW	NEUTRAL	8		S	€ 8.22
9	16X24X7B1	SIMRIT	6	Seal	L	€ 2.34
10	10-B	NEUTRAL	25 ft	Chain	C	€ 159.00
11	SPA907	OPTIBELT	123	Belt	T	€ 7.30
12	14H150	SIT	57		P	€ 52.37
13	290-10ML	LOCTITE	81	GLUE	M	€ 11.24

Once the file has been opened you can add, delete or adjust any of the lines of information within your stocklist.

BearingNet – Inventory

You will need to save this list as a Text (Tab Delimited) file before re-entering it into BearingNet using the AutoUpload program.

	A	B	C	D	E	F
1	USER NAME	STOCK ID CODE	1	you@emailaddress.com		
2	!BearingNet: Your Inventory					
3	!This is in the correct format for automatic upload. It can be modified in a spreadsheet and resubmitted.					
4	!PT Type = B=Bearings S=Sprockets C=Chain L=Seals T=Belts P=Pulleys M=Misc					
5	USERID	STOCK ID CODE	1	sales@bearingnet.net		
6	!Part	Brand	Quantity	Description	PT Type	Price

13	290-10ML	LOCTITE	81	GLUE	M	€ 11.24

*Rows 2, 3 and 4 are for information only and can be deleted or ignored as required.

Loading your inventory

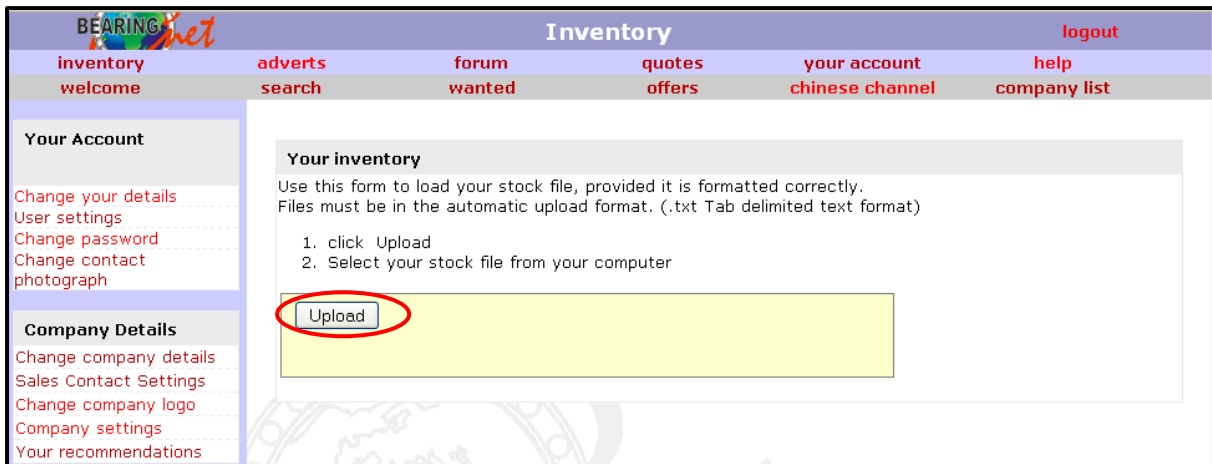

Once your new, adjusted or pre-formatted list has been saved and you want to enter it into BearingNet, you will need to Login and then go to the 'Inventory Page', by clicking the link.

To upload the file click on the 'Upload' button.

Inventory Maintenance		User Guide
Your inventory	Click here if you would like a copy of your current Bearingnet stock list. The file will be sent by email to _____ and will be in _____ the correct format for automatic inventory upload.	<input type="button" value="Request stock list"/>
Automatic inventory upload	Transfer your stock file to us (it must be in the correct format) More details about the automatic upload facility. Your unique stock identifier is:	<input type="button" value="Upload"/>
Loading your inventory for the first time	Please email your inventory in an Excel spreadsheet or another similar file format. Part Number, Quantity, and Brand are required. Description and Price are optional. Once prepared, email your inventory list to: stock@bearingnet.net Please send a replacement list every month. We will load your inventory for you. Please tell us if the list is a replacement or addition.	
Delete all of your inventory	To delete all your inventory please email stock@bearingnet.net	
Total hits this month	This is the number of searches performed on Bearingnet where a least 1 item of your inventory was displayed as part of the results. Use this as an indicator of how effective your inventory list is.	

The 'Your Inventory' Upload Dialog Box is displayed. To upload your inventory click on the 'Upload' Button and select the saved file which you want to upload into BearingNet. Once selected click on 'Upload'. The file is sent to BearingNet and will be automatically loaded. You will receive a confirmation email once the inventory has been loaded successfully. If there were any problems with loading your inventory then this will also be sent to you by email.

To download detailed stock upload instructions click on the “[More details about the automatic upload facility](#)” link in the ‘[Inventory Maintenance](#)’ table.

Inventory Maintenance		User Guide
Your inventory	Click here if you would like a copy of your current Bearingnet stock list. The file will be sent by email to _____ and will be in _____ the correct format for automatic inventory upload.	<input type="button" value="Request stock list"/>
Automatic inventory upload	Transfer your stock file to us (it must be in the correct format) More details about the automatic upload facility. Your unique stock identifier is:	<input type="button" value="Upload"/> <i>Find out more about Automatic Upload</i>

What happens next...

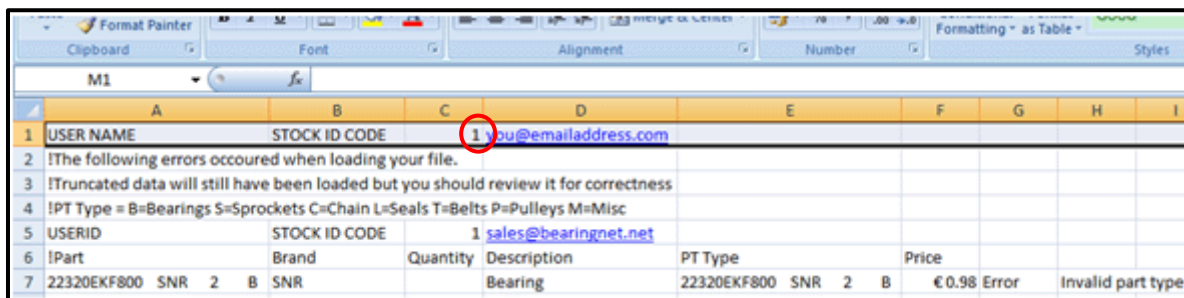

After you have successfully loaded your inventory, using the AutoUpload program, you will receive an automated email ‘[receipt](#)’ from BearingNet.

stock@bearingnet.net'. Below this is the date/time of processing: 'Thu, 11 Mar 2010 14:19:19 GMT'. The method of loading is 'Replaced existing list'. The products uploaded and old stock level/new stock level are listed as 'Bearings: 23023/23024'." data-bbox="214 632 757 797"/>

The email you receive will have an attachment which confirms your inventory has been loaded into BearingNet, the quantity of items and if there have been any lines with errors which have not been loaded by the AutoUpload program.

BearingNet – Inventory

The attachment in the email receipt when opened in Excel will look like the example below:

1	USER NAME	STOCK ID CODE	1	you@emailaddress.com					
2	!The following errors occurred when loading your file.								
3	!Truncated data will still have been loaded but you should review it for correctness								
4	!PT Type = B=Bearings S=Sprockets C=Chain L=Seals T=Belts P=Pulleys M=Misc								
5	USERID	STOCK ID CODE	1	sales@bearingnet.net					
6	!Part	Brand	Quantity	Description	PT Type	Price			
7	22320EKF800 SNR 2 B	SNR		Bearing	22320EKF800 SNR 2 B	€ 0.98	Error	Invalid part type	

In the notification is your **Username, Stock-Id, Email address & description of the error**. Once the error has been corrected, you can re-submit the problem lines. Please ensure that you change the “1” to “0” (circled above for illustration), so that the new and adjusted items are added to your listing and not replacing the listing completely.

Loading via FTP (Advanced Users)

If you would like to load your inventory via FTP, the settings are available from support@bearingnet.net

You will not see any files on the remote server, but you can simply transfer your files across. Please note that some versions of Internet Explorer will also work as an FTP client. In which case, enter the address <ftp://stock.bearingnet.net>

(Further instructions can be downloaded from the Inventory page of BearingNet in a .pdf document).

Your Inventory

Loading your inventory for the first time

The easiest way to load your inventory for the first time is to email your inventory list to stock@bearingnet.net and we will load it for you. This process is not as fast as the Automatic Stock Upload.

Delete your entire inventory

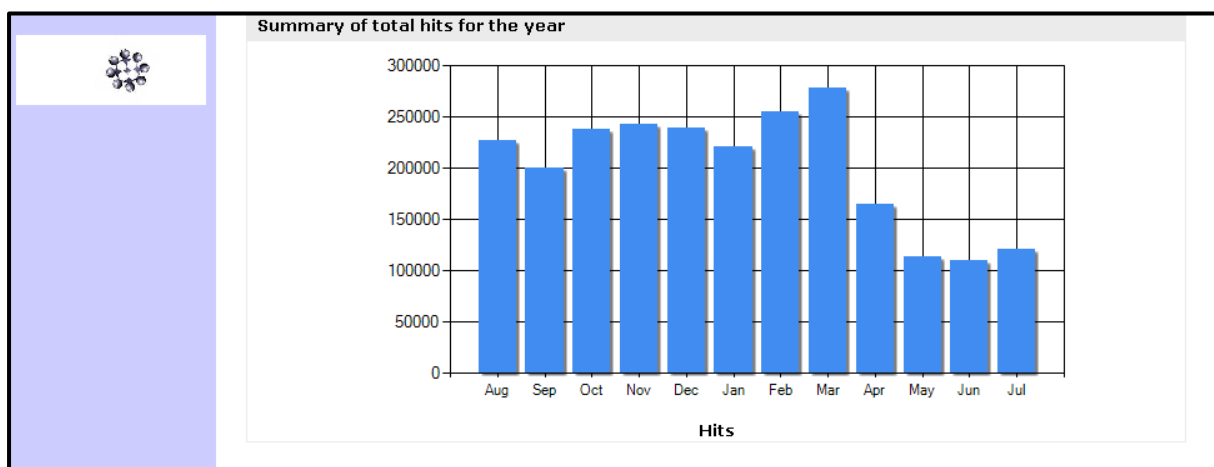

You can delete inventory manually. However if you want to delete your entire inventory listed on BearingNet then please send an email to stock@bearingnet.net. We will verify that you are authorised to make this request and then delete the inventory for you. Only BearingNet can delete your entire inventory.

Total Hits

A hit is a measure of the number of times your inventory has been found by other BearingNet members when they search. For example if you have a 22222 in your inventory and another company searches for a 22222 then the hit count for your inventory will increase by 1. So if the hit count is 2433 then your inventory has been displayed 2433 times this month. The number of inquiries that you receive should be higher if the hit count increases.

Summary of Total Hits for the Year

The Total Hits for the year chart details the hit count for your inventory for the past year showing the hit count for each month.

Stock Hiding Facility

As part of our continuing efforts to improve the usefulness of BearingNet we have added a facility whereby you can choose to prevent specific companies from being able to view your inventory. This will give you more control over your own inventory.

This facility would only be used when there are specific companies using BearingNet that you do not want to view your inventory. This could be a manufacturing member, close competitor or a company with whom you will never trade.

It should only be used when absolutely necessary.

Instructions

To select a company that you do not want to view your inventory go to **'Your Account'**

Then in the **'Company Details'** box select **'Sales Contact Settings'**

Set Company User Guide

Check All Uncheck All Select a user Select

Select	Company	Responsible for Sales	Can see your stock	Country
<input type="checkbox"/>	A & D Danubius Bearings	Peter Annis	Yes	Serbia
<input type="checkbox"/>	A & P Bearings Ltd	Peter Annis	Yes	UK
<input type="checkbox"/>	A & S Bearing	Peter Annis	Yes	USA
<input type="checkbox"/>	A D Bearings	Peter Annis	Yes	UK
<input type="checkbox"/>	A. Goldenstein	Peter Annis	Yes	Germany
<input type="checkbox"/>	A.B.A. Bearing Universo Better y Cia. S. en C.	Peter Annis	Yes	Colombia
<input type="checkbox"/>	A.I.S. Auvergne Industrie Specialities	Peter Annis	Yes	France
<input type="checkbox"/>	A.J. Wielens BV	Peter Annis	Yes	Netherlands
<input type="checkbox"/>	A.R. Los Restrepos	Peter Annis	Yes	Colombia
<input type="checkbox"/>	A.S.F.I. André Simon Fournitures Industrielles	Peter Annis	Yes	France
<input type="checkbox"/>	A.T.P. srl	Peter Annis	Yes	Italy
<input type="checkbox"/>	A/S Dansk Kugleleje Center	Peter Annis	Yes	Denmark
<input type="checkbox"/>	Aandrijftechniek TSL	Peter Annis	Yes	Netherlands

This will then present you with the ‘Sales Contact Settings’ screen where you can see which of your users are assigned to which company.

In the ‘Set Company’ table you will see the ‘Can see your stock’ column where everything is set to ‘Yes’. This means that these companies can see items from your inventory when they search on BearingNet.

To hide your inventory from a specific company firstly find the company in the ‘Set Company’ table by selecting by Company Name or Country.

Set Company User Guide

Check All Uncheck All Select a user Select

Select	Company	Responsible for Sales	Can see your stock	Country
<input type="checkbox"/>	A & D Danubius Bearings	Peter Annis	No	Serbia
<input type="checkbox"/>	A & P Bearings Ltd	Peter Annis	Yes	UK
<input type="checkbox"/>	A & S Bearing	Peter Annis	Yes	USA
<input type="checkbox"/>	A .J. Wielens BV	Peter Annis	Yes	Netherlands
<input type="checkbox"/>	A D Bearings	Peter Annis	Yes	UK
<input type="checkbox"/>	A S Bearings & Drives Services	Peter Annis	Yes	UK

Once the Company Name is displayed in the ‘Set Country’ table then click on the ‘Yes’ in the ‘Can See Your Stock’ column and the value will be changed to ‘No’.

BearingNet – Inventory

This means that no items of your inventory will be shown to that company when they search on BearingNet.

If you decide to change this at a later date, follow the same instructions except this time you will click on the 'Can see your stock' column on the 'No'. This will then change to 'Yes' and will unhide your inventory.
